Election/Restrictions

DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 97 - 136, drawn to a method of determining if an agent should service work items of a first work type in a work processing facility, classified in class 379, subclass 379/265/12.
- II. Claims 137- 150, drawn to servicing work items of a work type and states of a contact center, classified in class 379, subclass 379/266.
- III. Claims 165 - 178, drawn to a system for determining composite preference value, classified in class 709, subclass 226.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I, Group II and Group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, Group II deals a contact center which determines and selects a state of the contact center among a plurality of differing contact centers states, while the Invention of Group I is a method to determine if an agent should service a work item of a first work type, and Group III deals with assigning an agent to a work type based on composite preference values.
